How to use this book

This book contains 365 checkmate exercises, one for each day of the year, ordered from easiest to hardest in four parts: mate in 0, in 1, in 2 and in 3 moves.

In the **mate in 0** positions there is nothing to play: the position is already checkmate. The task is to see which piece gives mate and to check that the king has no flight square, that the check cannot be blocked and that the attacking piece cannot be captured.

In the other parts you must find the mate in the stated number of moves. In all of them the first move is a check, and every reply of the opponent must be taken into account.

White always plays up the board. Below each diagram you will find the side to move: □ White to move, ■ Black to move.

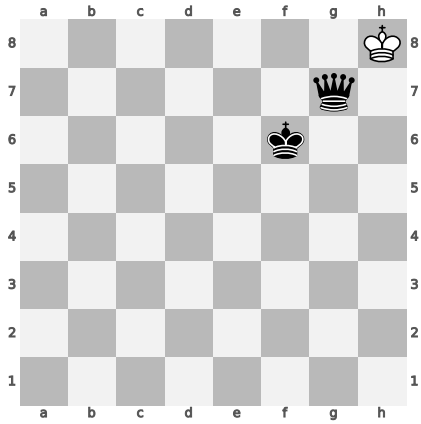

The solutions are at the end of the book. For each exercise you will find the key move, the main line and, in brackets, the other defences. If the defender chooses a weaker reply, mate may come sooner.

I

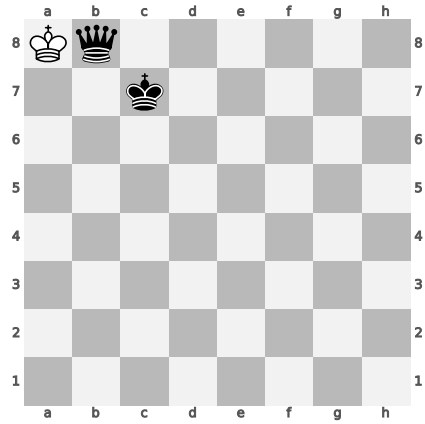

Mate in 0

The king is already checkmated. Find the piece that gives mate and why there is no defence.

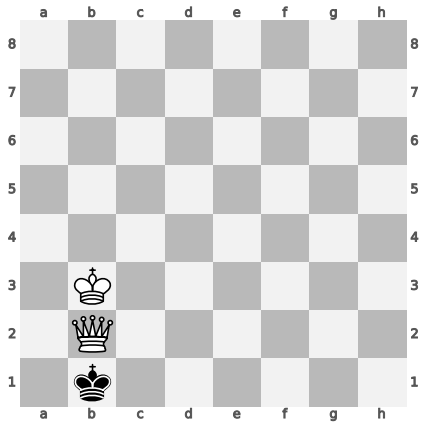

Exercises 1–36

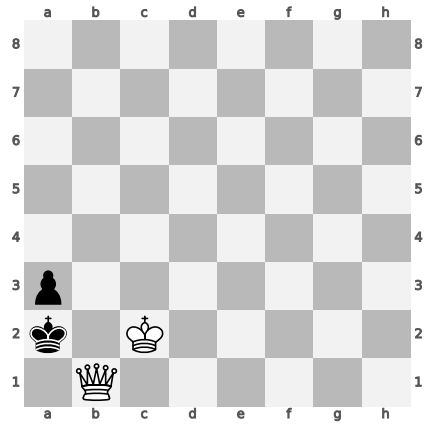

1. Who gives mate?
